

David Candela Martinez

Junior Security Analyst · Cybersecurity Operations · Threat Monitoring

Barcelona, Spain · +34 662 589 461 · davidcandelamartinez@icloud.com · [LinkedIn](#)

EU Citizen · Available for relocation across Europe

After 13 years at Apple I learned that the skills I value most are the ones cybersecurity demands: investigating problems until I find the cause, protecting sensitive data, communicating complex technical information clearly, and performing reliably under pressure. CompTIA Security+ and ISC2 CC certified (both first attempt). Training daily on TryHackMe (top 7% globally, 120+ day streak). Seeking a Junior Security Analyst or SOC Analyst role with operational discipline, analytical rigor, and a commitment to protecting people and systems.

AREAS OF EXPERTISE

Security: SIEM · Log Analysis · Alert Triage · Incident Response · Threat Detection · MITRE ATT&CK · Wireshark · Splunk · Elastic

Frameworks: NIST · ISO 27001 · Risk Assessment · Network Security

Technical: Python · SQL · Bash · Docker · Linux · Windows · macOS · Active Directory · Jamf Pro

KEY ACHIEVEMENTS

Investigation mindset: 13 years of diagnosing and resolving complex technical issues at Apple, progressing from retail to technical support to AI/ML operations. Promoted 3 times based on consistent delivery.

Calm under pressure: Maintained 88% customer satisfaction rate (target: 80%) while averaging 13 minute resolution times in a high demand, SLA driven environment.

Security commitment: CompTIA Security+ and ISC2 CC both passed first attempt. 120+ day TryHackMe streak, ranked in the top 7% globally. Built a data analysis pipeline using Python and Claude Code.

PROFESSIONAL EXPERIENCE

Apple Corporate, Barcelona, Spain *Feb 2021 – Present*

Operations Analyst, AI/ML

- Apple Intelligence initiatives, supporting data quality, validation, and annotation processes for AI driven features across Apple's ecosystem.
- Investigated and resolved data integrity issues across production pipelines, applying the same methodical, evidence based approach required for security event analysis.
- Built a data analysis pipeline using Python and Claude Code, automating repetitive reporting workflows and demonstrating scripting skills directly applicable to security automation.
- Acted as the go to person (SME) for technical escalations, mentoring junior team members and improving incident resolution processes and response times across the team.
- Led adoption of new internal tooling across teams, translating complex technical requirements into clear procedures and reducing friction during rollout

Apple Store, Barcelona, Spain *Feb 2016 – Feb 2021*

Technical Specialist

- Triaged, diagnosed and resolved complex hardware and software issues, triaging each case by severity and impact, averaging 13 minute resolution against a 15 minute target.
- Maintained 88% customer satisfaction rate (target: 80%) through clear, honest communication and methodical troubleshooting under high pressure conditions.
- Built systematic diagnostic workflows that strengthened root cause analysis skills directly applicable to security incident investigation.

Apple Store, Barcelona, Spain *May 2012 – Feb 2016*

Shopping Specialist

- Provided expert technical consultations across Mac, iOS, and Apple Watch product lines, earning promotion from part time to full time based on consistent performance and customer trust.

HANDS ON SECURITY TRAINING

TryHackMe *Top 7% globally · 120+ day streak*

- Completing SOC Level 1 path: alert triage, SIEM operations (Splunk, Elastic), log analysis, network traffic inspection, and incident reporting.
- Investigating simulated security events using real world attack scenarios, applying MITRE ATT&CK framework for threat classification and structured analysis.
- GitHub portfolio: github.com/david-candela/cybersecurity_journey

EDUCATION

Computer Engineering *Studies 2010 – 2012*

Universitat Pompeu Fabra, Barcelona
